

## Jubilee Trees for Norfolk

### North Wootton Village

We are honouring the Queen's Platinum Jubilee year by supporting the initiatives "One Million Trees for Norfolk" and "The Queen's Green Canopy". Our aim is to create a legacy to pay tribute to Her Majesty's dedicated service over the past 70 years.

These trees will play an important role in the landscape of the future. They'll provide habitats for a range of wildlife and offer important carbon-capture into the future.

The species will be a mix of : English Oak, Hornbeam, Common Beech, Common Alder, the trees are whips so they are not too big at the moment.

We in North Wootton will be planting 125 trees within the boundaries of the village and would like your help to achieve this. We will be putting on an event at the North Wootton Village Hall on Saturday 11th February from 11:30 onwards. All the necessary kit will be provided to do this, all we ask is that you are suitable dressed for the weather on the day. We will be sending teams out to different parts of the village to plant the trees in suitable areas. After we have planted all the trees every one will be invited back to North Wootton Village Hall for food and drinks.

Maybe if you bring your children/grandchildren, they would like to adopt a tree and look after it, check that it is ok, watch it grow and water it in the drier season.
